Finalize

Welcome

The asbestos enrollment survey will walk you through a series of questions related to your facility and will gather information on any asbestos-containing materials in your building(s).

There are seven sections to the survey:

1. Welcome
2. Building Information
3. Student Demographics
4. Asbestos Questions
5. Renovations
6. Document Upload
7. Finalize

You must save your progress on each page. You can sign out and come back to complete your enrollment survey at any time.

Your enrollment is not finished until you complete and submit the survey.

Click the **Next** button below to begin.

Note that the lead-based paint and lead in water surveys are in other sections and must be completed separately.

The physical addresses we have on file for your facility are listed below. It is required that your facility list at least one physical address. You may add additional addresses or modify existing addresses using the buttons below. You should not edit or delete the address designated for shipping as this will be used to send the sampling kit for the water section.

If your facility has multiple addresses, designate the main building as the physical address.

The AHERA Rule allows facilities to be exempt from the asbestos inspection requirements if an architect or project engineer responsible for the construction of a new school building built after October 12, 1988, or an accredited inspector signs a statement that no asbestos was specified or used in the construction of the building. [Learn More.](#)

You indicated that all buildings at your facility were built after 1988.

Does your facility have AHERA asbestos inspection exemption letter(s) for all buildings at your facility?

Yes - the facility's asbestos management plan includes signed statement(s) by an architect, engineer, or accredited inspector that st... | v

If you select "Yes," you will be directed to the Document Upload section to upload your facility's AHERA asbestos inspection exemption letters for all buildings. This will end the enrollment survey. RTI will review the survey to determine if your facility can be exempt from the asbestos reinspection requirements per 10A NCAC 41C.1002-.1007.

Asbestos Management Plan

Asbestos Management Plan

Is your facility's asbestos management plan available for electronic upload?

Yes - I can upload the document(s) electronically

Yes - I can upload the document(s) electronically

No - I cannot upload the document(s) electronically, but I can mail the document(s) to RTI

No - I cannot upload the document(s) electronically and I cannot mail the document(s) to RTI

No - I do not have the document(s)

If your facility has been inspected for asbestos, the management plan provided to RTI should include (at minimum):

- Most recent reinspection report (or inspection report if no asbestos-containing materials were identified)
- Sampling results associated with any remaining asbestos-containing material
- Most recent periodic surveillance (if the facility has asbestos-containing materials)
- AHERA asbestos exemption letters for any new school buildings, as applicable
- Records of any asbestos-containing materials mitigated/abated in the past three years (i.e. removals, repairs, enclosures, encapsulations)

Is your facility's asbestos management plan available for electronic upload?

No - I do not have the document(s) 

If your facility has been inspected for asbestos, the management plan provided to RTI should include (at minimum):

- Most recent reinspection report (or inspection report if no asbestos-containing materials were identified)
- Sampling results associated with any remaining asbestos-containing material
- Most recent periodic surveillance (if the facility has asbestos-containing materials)
- AHERA asbestos exemption letters for any new school buildings, as applicable
- Records of any asbestos-containing materials mitigated/abated in the past three years (i.e. removals, repairs, enclosures, encapsulations)

Reinspection Report

Is your facility's most recent reinspection report available for electronic upload?

Inspection report can be provided if no asbestos-containing materials were identified in the original AHERA inspection

Yes - I can upload the document(s) electronically

Periodic Surveillance Report

Is your facility's most recent periodic surveillance report available for electronic upload?

Yes - I can upload the document(s) electronically

Building Age Exemptions

The AHERA Rule allows buildings to be exempt from the asbestos inspection requirements if an architect or project engineer responsible for the construction of a new school building built after October 12, 1988, or an accredited inspector signs a statement that no asbestos was specified or used in the construction of the building. [Learn More.](#)

Does your facility have any new school buildings built after 1988 that are exempt from being inspected for asbestos?

Yes

Are your facility's AHERA asbestos inspection exemption letters available for electronic upload?

Renovations

Has your facility gone through major renovations since the original AHERA asbestos inspection was conducted?

Yes

Does your facility have any upcoming renovations planned or scheduled?

Yes

When are the renovations scheduled?

09/28/2023

Please provide a brief description of the planned renovations.

This field is required

Has your National Emission Standards for Hazardous Air Pollutants (NESHAP) inspection been scheduled?

Yes

When is or when was the inspection?

09/28/2023

NESHAP requires areas or buildings to be inspected before renovation or demolition. The inspection includes identification of possible asbestos-containing materials.

AHERA requires schools to perform an original asbestos inspection to determine whether asbestos-containing materials are present and then reinspect any asbestos-containing material every three years. [Learn More.](#)

Has your facility already performed an AHERA asbestos inspection to determine whether asbestos-containing materials are present in your building(s)?

No

If your facility has not been inspected for asbestos, an asbestos inspection by a professional may be required.
